

SADC CLIMATE SERVICES CENTRE (CSC) HEAVY RAINFALL ADVISORY

Issue Number: 3 of 2020/21 Season

Release Date: 08/11/2020

FORECAST PERIOD: 08 TO 14 NOVEMBER 2020

HIGHLIGHTS

HEADLINE: The SADC CSC is forecasting a likelihood of rainfall amounts exceeding 50mm in a 24-hour period in some parts of the SADC region during the period 08 to 14 November 2020.

Eastern Angola, south-eastern Botswana, Comoros, most of Democratic Republic of Congo, eastern Lesotho, north-eastern Madagascar, southern Mozambique, north-western United Republic of Tanzania, north-central and south-eastern South Africa and west and northern Zambia have a high probability to receive heavy rainfall above 50mm in 24 hours (Figure 1) during the forecast period from 08 to 14 November 2020. There are indications that rainfall amounts may exceed 100mm (red) over a 24 hours especially in some of these areas. These rains are likely to result in localized flooding in certain areas.
