**CLIMATE SERVICES CENTRE**

**SEASONAL OUTLOOK FOR JUNE-JULY-AUGUST 2019**

**Release Date: 05/06/2019**

---

**SUMMARY OF THE JUNE-JULY-AUGUST 2019 SEASONAL OUTLOOK**

The bulk of the Southern African Development Community (SADC) is expected to receive normal to below-normal rainfall with an exception of the northern half of the Democratic Republic of Congo, extreme northern and coastal areas of Tanzania, northern Madagascar, Mauritius, Comoros and Seychelles where normal to above normal rainfall is expected.

Both maximum and minimum temperatures are expected to largely be normal to below normal in the southern and northern parts of the contiguous SADC region. The bulk of the central areas of the region will experience normal to above normal temperatures during the June-July-August 2019 period.

## SEASONAL OUTLOOK FOR JUNE-JULY-AUGUST (JJA) 2019
